

PREMIUM MAPLE HARDWOOD
SPORTS FLOORING

Boo Williams Sports Complex, Hampton, Virginia, USA

Action[®] for players.

High-performance sports floor systems
designed for athletes — and sustainability.

NEGATIVE

ISO 14000:2006 VERIFIED

Taking a global leadership role in a changing marketplace.

In the world of sports floors, Mercer, Wisconsin occupies a prominent position. From here, Action Floor Systems equips fine athletic facilities the world over with high-performance hardwood maple sports floor systems. Builders and owners of these facilities recognize and value Action's reputation for innovation, product quality, responsible manufacturing practices and a wide-reaching focus on sustainability.

Caring about resources means caring about sourcing.

Proponents of sustainable-design projects look to a manufacturer's complete supply chain to ensure environmentally and socially responsible practices are in place. When it comes to sports floors, key concerns arise in terms of sustainable forest and mill management.

Action Floors has addressed these concerns through various independent certification organizations that set industry sustainability standards. Action is proud of its affiliation with the Forest Stewardship Council (FSC) and SmartWood — organizations that verify the origins and legality of forest products, the accuracy of carbon calculations and assess management practices for High Conservation Value Forests.

Premium maple from well-managed forests near our headquarters.

All-natural rubber pads produced from a renewable sustainable resource.

Water-based, solvent-free synthetic flooring.

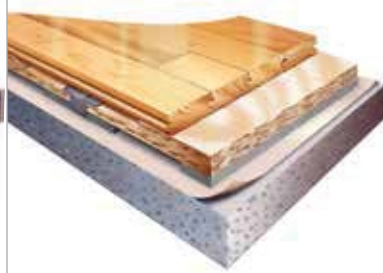

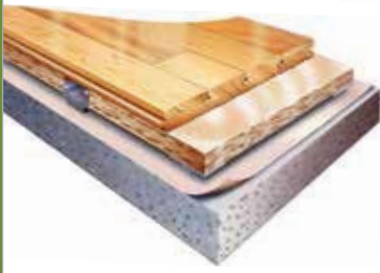

Resilient floor material produced from recycled rubber.

Floor systems designed for maximum athletic comfort and minimal fatigue.

<p>SCORES™</p>	<p>“SCORES” — Action's own SCORES criteria (Sustainable Construction Of Renewable Engineered Surfaces) represents their commitment to the environment. This third party-verifiable program has driven the push for minimizing environmental impact from all aspects of the manufacturing process. Learn more at www.actionfloors.com/scores.</p>
	<p>Forest Stewardship Council — Action is affiliated with the Forest Stewardship Council (FSC) and SmartWood — organizations that verify the legality of forest products, the accuracy of carbon calculations and assess management practices.</p>
<p>EN Certification</p>	<p>EN Certification — is the current European Union Performance criteria for indoor athletic floor systems. Contact your Action representative for information on how to incorporate these new performance standards into your new floor specification. EN supercedes DIN standards 18032 Part 2. Systems also tested and certified to meet or exceed MFMA (PUR) and DIN 18032 Part 2 Performance Standards.</p>
	<p>MFMA — Action adheres to Maple Flooring Manufacturers Association, Inc. (MFMA) product quality, performance and installation guidelines; and provides detailed information related to safety, performance and maintenance of maple flooring products.</p>
	<p>FIBA Certification — For applications requiring adherence to specific FIBA standards, Action has a variety of qualified systems. Further, your Action representative will clarify the role of FIBA standards as it applies to wood sports floors.</p>
	<p>Certified Carbon Negative Footprint — Action has been certified as a Carbon Negative provider following a Life Cycle Assessment conducted by the University of Wisconsin and Carbon Clear, an international independent auditor of manufacturing carbon profiles. Action is the only MFMA-accredited mill to receive this credential.</p>

FIXED RESILIENT

Choose the combined benefits of these Action "hybrid" floor systems, featuring the resiliency of a floating floor and the stability of an anchored subfloor.

- ChannelFlex Ultra NR
- ChannelFlex Ultra F
- Action Aero NR
- Action GreenFlex F1
- PowerChannel
- ProAir AR
- AnchorFlex
- Concorde II
- AnchorFlex LP
- Concorde
- Anchored-Action Cush II Plus

FLOATING SYSTEMS

These floor systems are not anchored to the concrete substrate. A selection of pad or sleeper options provide superior shock absorption and resiliency.

- ProAction Thrust
- ProAction Thrust LP
- ProAction Flex
- Interloc II
- ActionThrust I
- Interloc I
- ActionFlex
- ActionCush I
- ActionCush II
- ActionCush II Plus

PORTABLE SYSTEMS

The NitroPanel Portable Floor Systems feature design innovations, premium materials, and manufacturing technology that delivers strength and durability for athletic performance, along with easy assembly.

- Action NitroPanel
- Action NitroPanel FC
- Action NitroPanel Club

FLOOR COVERINGS

Our new floor cover system offers the most advanced protection available. Engineered with a patented air blower system, it floats the cover for ease in installing and removing the cover efficiently, while eliminating the danger of damaging the floor in the process.

Action AirRide®

(actionfloors.com)

You have dozens of Action floor system options to choose from, and we've made it easy for you to zero-in on the best fit for your project. Just visit our website and click on "Choose a Facility."

- Select the type of facility or activity that matches your permanent installation or portable system project.
- Select the level of primary-usage performance characteristics your project requires.
- Compare the specifications of recommended floor options.
- View detailed, top-to-bottom cross-section illustrations of all floor systems.
- Download CAD graphic files, BIM 3-D and product specifications.
- Or, if you must match a specification for a custom project, e-mail us your requirements. We'll respond quickly.

For technical assistance, custom specifications or matching a specification, contact us at:
