

Newstripe's Infield Grooming Equipment

Newstripe's Infield Groomers feature adjustable cutting depth, drag and roller height positions. Their versatility can address a wide variety of field conditions and maintenance levels. Backed by our 18-month warranty, all feature industrial components and are built with the heaviest material for years of service.

Dirt Doctor™

The 6' wide Dirt Doctor model is our heaviest unit requiring full-sized tractors and uses a 3-point hitch for serious reconditioning up to a 3" depth. Reversible harrow teeth and our unique pulverizer bar with drag section and compacting roller can break up hard packed material, remove grass clumps and leave a playable surface in one pass. A Broom Kit or Finishing Drag are available options.

Dirt Doctor Jr™

Designed for compact tractors or 4WD utility vehicles, the 4' wide Dirt Doctor Jr features the same type pulverizer bar and drag as the larger Dirt Doctor plus, No Tool height changes. This groomer features an optional Finishing Broom and is available in a tow or 3-point hitch model.

Dirt Medic™

Break up packed surfaces, level ridges and ruts, and finish broom with the 4' wide Dirt Medic. Built with the durability of our larger units, but weighing less than 200 lbs, the Dirt Medic can be towed with garden tractors, ATV's or light utility vehicles. A simple hand crank adjusts angles of both the harrow teeth and planing blade simultaneously. The teeth may be completely raised to use just the blade and/or broom.
