# FIELD COVERS

## TRUSTED BY THE PROS WHEN IT MATTERS MOST

As the company that introduced lightweight field covers to the industry 30 years ago, COVERMASTER® has manufactured and sold more field covers than any other company. Through this experience in manufacturing, and extensive feedback from our clients, which includes Professional Teams to High Schools, we have continuously redesigned and developed cutting edge materials. Unlike others, we do not sell field covers made from industrial grade fabrics. Due to the size and unique requirements of athletic field covers, we have sought out and tested superior strength polyethylene covers, where we have been able to reduce the weight of the cover to save hundreds of pounds in weight for the grounds crews, while still achieving superior strength characteristics and greater durability. Made from high quality resin, our pre-elongated core tapes provide superior stability and increased strength and durability, as they will not stretch when pulling the raincover. Rather than adding extra inexpensive low density polyethylene coating, we maintain a lighter weight field cover by investing in heavier high density polyethylene black core tapes, which are highly UV stabilized and provide 100% sunblock. This higher denier core ensures full tape coverage for higher fabric stability and lighter weight covers with superior strength, performance and durability. Consider these features when comparing competitive products.

Covermaster offers cutting edge varieties of field covers with closure systems. Available on Football/Soccer field covers, our closures effectively join the individual sections into one large field cover. Velcro is ideal for our lightweight field covers, while we recommend our heavy duty plastic zipper for our Raincover Vinyl Field Covers.

Anyone can sell an inexpensive imported industrial grade fabric, but only COVERMASTER® manufactures and sells an athletic field cover specifically designed for this unique and demanding application. When you build something better, word gets around. Ask those who know.

# PREMIUM FIELD COVERS

## RAINCOVER ULTRA™

As the company who introduced lightweight field raincovers over 30 years ago, Covermaster continues to lead the industry. Our ongoing Research and Development, coupled with our experience and customer feedback, has led to the latest technology in lightweight Raincover design. With Raincover Ultra™, we have created the industry's strongest core raincover, which is critical when removing hundreds of pounds of water from the cover's surface. We then reconfigured the weave count of the core, resulting in a more stable base, as well as creating a 100% sunblock, to keep the turf cooler. In addition, the core tapes are pre-elongated, which stretches each strand of the core prior to use on your field, resulting in a highly stabilized cover, which is more durable, and results in less stress on the raincover's surface coating. Then, to keep the turf

cooler and drier, we utilized our exclusive Shield-Tek™ coating technology. The Raincover Ultra's surface is designed with less friction in mind, to resist dirt accumulation better than other covers, as well as making it easier to remove snow and ice. All of this was accomplished without sacrificing weight. At over 200 pounds lighter than other available covers, Raincover Ultra™ is not only the strongest cover of its kind, it is also easier to handle and saves time and labor costs.

### Turf Friendly Color Options:

\* Minimizes heat build-up

\* Silver side up to reduce heat build-up, black side up to draw heat into the field in colder climates

## RAINCOVER MAX™

Raincover Max™ with Shield-Tek™ is the choice when only the absolute best is required. Available in a white/black or blue/green color combination, this exceptional and unique material is 50% lighter than vinyl and 150% stronger, which makes it ideal to protect against snow as well as rain. With its exclusive Shield-Tek™ coating, it will reduce heat build-up under the cover.

Colors:

\*

\* Actual colors may vary

\*\* Warranties are prorated

- FLEX CRACK RESISTANCE (ASTM D-6182) Increases flex crack performance by 300%. Cover will stand up better to continuous folding and unfolding
- ABRASION RESISTANCE (ASTM D-3884-92) Up to ten times more abrasion resistance as compared to other covers
- ANTIOXIDANT WITH SUN GUARD® additive to reduce heat build up under the cover
- SEAM STRENGTH (PEEL) (ASTM D-4851) Improved seam strength - 150% at room temperature - 200% at 140° F (60° C). In tests, seams maintained an average of 97% fabric strength at temperatures as high as 140°F
- Available in RAINCOVER MAX and RAINCOVER ULTRA

# PREMIUM FIELD COVERS

## RAINCOVER PREMIER™

While Raincover Premier is comparable to the 6 ounce fabric alternatives in the marketplace, it boasts more impressive specifications and performance, without the extra weight. In fact, at over 260 pounds lighter on a full size field cover section, Raincover Premier will have superior performance and be easier to handle, requiring fewer crew members.

Colors:

## RAINCOVER VINYL

For those who prefer conventional, heavier weight covers, COVERMASTER® offers a wide selection of colors and weights. These premium covers are available in both 10 ounce and 14 ounce weights, with strength and durability which are second to none.

## FIELD COVER GRAPHICS

In yet another first from COVERMASTER®, graphics are now available for our lightweight polyethylene covers, as well as our vinyl covers. To the delight of marketing departments in every organization, revenue generating ads or team logos can now be placed on COVERMASTER®'S series of lightweight polyethylene field covers. Our new cutting edge technology opens up a new revenue stream for every team. Field Graphics are available on all materials from our full field covers, to our Sideline Covers, Cross-Over Covers and even our Fitted Storage Covers.

# INFLATABLE FIELD COVER SYSTEM

COVERMASTER® is proud to provide the ultimate semi-automated field protection system, the Inflatable Field Cover. This is a revolutionary product that is a proven field management tool used to protect against the extremes of winter, be it rain, snow or extreme cold.

- Comprised of a translucent, waterproof, lightweight material in multiple sections.
- Each section includes restraint webbing running the full length of the sheet at 10 ft. (3.05m) intervals and fitted with a unique toothless high performance zipper system.
- A support tube 18 ft. (5.5m) in diameter with all the necessary air flow and ducting vents
- Heater / Fan unit
- A specifically designed natural gas burner (optional) and centrifugal fan all mounted on a mobile four wheel chassis.
- Provides proven and practical protection against periods of extreme rain, snow, cold, or a combination of all three.

The Inflatable Field Cover provides proven pregame management to ensure your field is game ready no matter the weather conditions prior to the game. Once installed, the cover provides a complete dome over top of your playing surface to maintain the optimal environment for the field. The cover is made of a unique material that is translucent, waterproof and lightweight, which allows for photosynthesis and airflow for your natural grass and synthetic turf. It is semi-automated, allowing for easy handling and fast installation, and can allow for maintenance and repair work to continue below the cover. The Inflatable Field Cover has a temperature tolerance down to -5°F (-20°C) and in recent winters the Inflatable Field Cover has succeeded in managing extreme weather conditions at many of the biggest winter sporting events, including International Rugby and Wembley Cup Finals. The Inflatable Field Cover comes with 5 key elements - an inflatable tube, sheet covers, a fan unit, anchors, and storage reel system.

## INFLATABLE FIELD COVER SYSTEM

# FLOOD WATER ABATEMENT COVER

## FLOOD COVER

In a single event flood water can destroy the performance of an athletic field, not only will it cost you money and time to repair the field, but the performance of the athletic field can be changed, or worse, the turf can be totally destroyed.

This damage results from flood water containing silt, organic matters and contaminated debris.

COVER IN PLACE

FLOOD WATER RISES

## CASE STUDY

Back in 2001, COVERMASTER® designed and supplied Union Endicott Central School District, in Endicott, NY, a custom field cover that could be used to protect their synthetic turf football field from sediment contamination of the in-fill material during the expected seasonal flooding, from the adjacent Susquehanna River. After many years of successful protection, it was time to replace their current cover. The School District returned to Covermaster for the task of replacing the cover with an updated design that would be lighter and easier to handle. The new design maintained the original custom vents that allow the water from below (backflow) to escape, rather than having it trapped under the cover, and to keep the cover from rising with the water. However, this time they requested Covermaster's lightweight yet incredibly strong Raincover Max™ material, in a White/Black color combination. This made the cover lighter and easier to handle, as did the Velcro™ fastening system to join the sections, which replaced the older zipper system from the previous cover. Finally, they incorporated Covermaster's new TarpMate™ Air Rollers, which will reduce the time, effort and number of people required to install and remove the covers, as well as reducing their storage requirements.

# SYNTHETIC TURF COVER

## ENVIRO SHIELD™

### EXTENDS SYNTHETIC TURF LIFE SPAN BY PREVENTING SUN DAMAGE

Enviro Shield™ is a revolutionary new product from Covermaster. Easy to handle and store, it is the first product designed specifically to protect outdoor Synthetic Turf from harsh environmental factors. Enviro Shield™ will extend the lifespan of synthetic turf by protecting it from the sun's UV Rays when the field is not in use, or during the offseason. With its unique Smart Edge Technology™, rainwater can penetrate to keep the field clean and naturally washed, while allowing the cover to be cut to any custom size or shape on site. Additionally, it will keep the field clear of debris, and other windblown objects, creating a safer and cleaner environment for the athletes who compete on the turf. It also allows the turf manager to protect against unauthorized use of the field, as a field that is covered with an Enviro Shield™ cover creates an unplayable surface for trespassers. Enviro Shield™ easily pays for itself as it extends the field service life and defers field replacement costs into the future, while maintaining a safer and more aesthetically pleasing field, keeping debris and bird droppings off of the turf.

## WHY USE SYNTHETIC TURF COVERS?

### SYNTHETIC TURF ISSUES

- Fading & discoloration of turf
- Exposed to debris from the environment
- More time required for maintenance
- Difficult to prevent unauthorized use

### ENVIRO SHIELD™ ADVANTAGES

- Protection from Ultraviolet rays
- Rain can penetrate through the cover and naturally clean the turf
- Effective means in preventing unauthorized use of field
- keeps debris off the turf

### BENEFITS

- Better turf and logo color
- Cleaner turf
- Longer turf life span
- Saves money by delaying replacement cost
- Turf plays better for a longer period of time

### SMART EDGE TECHNOLOGY™

With Smart Edge Technology™, Enviro Shield™ can be custom cut on site to any size, shape, or around goal posts. The cover will not pull apart in the middle, providing protection against turf damage.

# EVERGREEN® TURF COVERS

## EVERGREEN®

### 30 YEARS OF FIELD PROVEN EXPERIENCE

EVERGREEN® Turf Covers produce a greenhouse effect allowing your turf to breathe and retain the right amount of heat and moisture. The result is faster germination of newly seeded areas and deeper root development. All Evergreen® covers are uniquely woven to be permeable and are made of translucent polyethylene with a patented lace coating. They are UV treated, rot and mildew resistant, and will not show any significant wear or degradation by sunlight, even after years of regular use.

### SMART EDGE TECHNOLOGY™

Only Evergreen® has the revolutionary *SMART EDGE TECHNOLOGY™*. The secret is the patented lace coating, which provides integrity for the cover without the need for hems and grommets. The cover will not pull apart in the middle, providing protection against turf damage. Unlike other tightly woven covers which restrict airflow, the lace coating on Evergreen® allows for the right amount of ventilation. Every Evergreen® cover can be cut or shaped with ordinary scissors, without the edges fraying or damaging the cover.

### FEATURES AT A GLANCE

- Accelerates grass growth
- Frost and winter protection
- Easy installation & removal in minutes
- Lightweight one piece construction
- Perfect for repairing heavy wear areas, saves on turf cost and maintenance
- Outlasts the competition
- Stronger & deeper root development
- Each cover comes with our exclusive SMART EDGE TECHNOLOGY™ - customize size and shape any time, onsite as needed
- Exclusive material that is only used in the turf industry
- Controlled earlier spring green-up
- Delay dormancy for late season sports
- Vented to allow the perfect amount of air, water & light penetration
- Non-absorbing and non-clogging, keeps the same performance year after year
- Ideal for daily use
- Anchor pegs are included, which can be placed anywhere on the cover without damage
- No hems or grommets that restrict anchor peg placement are required, but are available upon request
- Won't unravel like polypropylene materials
- Ideal for Transition Zone climates
- Color choices provide additional light spectrum benefits for turf

#### PROTECT AGAINST FROST

#### OUTSMART MOTHER NATURE SEE THE DIFFERENCE WITH EVERGREEN

#### NO HEMS OR GROMMETS REQUIRED

Highly visible pink coated anchor pegs supplied with Radiant, Spectrum and Premium models, uncoated pegs supplied with Original model.

The optional Cover Disk allows for more secure anchoring of Evergreen® covers in high wind conditions, when used with the included anchor pegs. They allow sunlight to penetrate and can be placed anywhere in the cover.

## EVERGREEN® RADIANT (SILVER LACE COATING)

Evergreen® Radiant has a specialized silver lace coating designed to radiate additional heat back to the soil. With up to a 25% increase in heat retention, this is our longest lasting and most specialized turf cover, incorporating new fabric technology. Evergreen® Radiant is very effective for all types of climates and is extremely efficient for locations with a higher than average fluctuation in temperature. It also features stronger UV inhibitors, which help to protect the cover, giving it longer durability. It has a 12-year pro-rated Limited Warranty and includes our exclusive pink powder coated anchor pegs for easy installation and high visibility for removal.

## EVERGREEN® SPECTRUM (ORANGE LACE COATING)

Evergreen® Spectrum has an orange lace coating that is designed to work with the sun to provide the optimal light for turf growth. The unique orange coating helps refract the sun's penetrating light into an orange/red light for enhanced turf growth and health. Evergreen® Spectrum has been made with our patented coating technology, protecting new and established turf and accelerating growth for all types of applications. It is both dependable and reliable for multiple season use. Evergreen® Spectrum provides proven experience coupled with an 11-year pro-rated Limited Warranty and includes our exclusive pink powder coated anchor pegs for easy installation and high visibility for removal.

## EVERGREEN® PREMIUM (GREEN LACE COATING)

Evergreen® Premium has a dark green lace coating that is designed to draw in more heat, which can increase the ground temperature in excess of 10°F (5.5°C). The color also has a great appearance that blends in with natural turf surroundings. Evergreen® Premium has been made with our patented coating technology, protecting new and established turf and accelerating growth for all types of applications and constructions. It is both dependable and reliable for multiple season use and has helped to set a standard for quality and longevity within the turf industry. Evergreen® Premium provides proven experience coupled with a 10-year pro-rated Limited Warranty and includes our exclusive pink powder coated anchor pegs for easy installation and high visibility for removal.

## EVERGREEN® ORIGINAL (WHITE LACE COATING)

For over 35 years, our Evergreen® Original patented cover has set the standard for turf covers in the industry. Unlike competing covers, it works like a greenhouse by allowing sun, air and moisture to penetrate the cover and reach the turf. This feature also allows any excess heat to be released through its unique lace coating. Evergreen® Original is easily identified by its white lace coating and offers all the benefits of Evergreen® turf covers at a price that can fit even the most modest of budgets. Evergreen® Original comes with a 7-year pro-rated Limited Warranty and uncoated anchor pegs.

# FIELD COVER ACCESSORIES

## FITTED STORAGE COVERS – VINYL & POLY

Fitted covers are available in both vinyl and poly. Manufactured in standard and custom sizes, they are suitable for advertising, sponsorship and team logos. Full digital graphics provide an impressive image on any field.

## FLAT STORAGE COVER - POLY

A separate, flat cover is available to protect your raincover against harmful UV damage from the sun during storage. It also protects the raincover from sharp warning track material during handling.

## CLOSURE SYSTEMS

Available on abrasive athletic field covers, our closures effectively join the individual sections into one large field cover. Velcro® is ideal for our lightweight field covers, while we recommend our heavy duty plastic zipper for our Raincover Vinyl Field Covers.

## SUR-HOLD™ SAND BAGS - VINYL

These heavy duty sand bags are designed to last. Made from 18 ounce coated vinyl, Sur-Hold™ Sand bags were designed specifically for sports field applications. Easy to handle, these tube style sand bags are 8 inches in diameter by 36 inches long. They will not only hold your covers in place, but also can be used for other areas on your field. Available in a wide range of colors, Sur-Hold™ Sandbags are the obvious choice for those looking for quality and durability.

Colors: White Grey Blue Green Red

## POLY SAND BAGS

Polyethylene sand bags allow for quick anchoring of all raincovers, at an economical cost.

## RAINCOVER-AID™ REPAIR SYSTEM

Raincover-Aid™ is a self-adhesive backed, durable, flexible, airtight, watertight, puncture-resistant, high-strength repair patch. Raincover-Aid™ is specifically designed to adhere to COVERMASTER® Raincovers. Each Raincover-Aid peel and stick repair patch is made from an exceptionally tough, matte finish, abrasion resistant, elastomer that resists puncture and tearing. Raincover-Aid provides a simple and easy method for patching holes and tears.

## TARPMATE™ AIR ROLLER

TarpMate™ Air is a revolutionary storage and handling system for field covers. It eliminates the need to fold/unfold a cover prior to installation/removal. Due to TarpMate Air's light weight, it only takes 2 people to roll and unroll a 100ft (30m) wide field cover section, greatly reducing the time and effort required to handle field covers and turf blankets. TarpMate Air is easily inflated with standard backpack blowers.

### STANDARD SIZES:

- 38" Diameter x 95' Long
- 38" Diameter x 75' Long
- Custom Lengths Available

READY TO ROLL COVER

DEFLATED WITH COVER ROLLED UP INSIDE

TARPMATE™ AIR WITH COVERS ROLLED & STACKED

## TARPMATE™ ROLLERS

Designed to install, remove and store any COVERMASTER® Field Cover, TarpMate™ is a strong and lightweight roller that is easy to handle. Made of plastic, it will not rust or corrode. A smooth inner core liner provides greater overall strength, while its annular corrugations allow for straighter rolling. TarpMate™ is also available with optional SAFETY end caps, which prevent rodents and pests from being able to nest inside.

### STANDARD SIZES:

- 28" Diameter x 20' Long (recommended for Football / Evergreen)
- 28" Diameter x 30' Long (optional)
- 28" Diameter x 50' Long (optional)

TARPMATE™ SAFETY END CAP

## TARP MACHINE™

With the TARP MACHINE™, any field cover roller can be moved around at will. It's a tool that's a must for frequent users of tarps or where manpower is not readily available. The well-constructed chassis is made of heavy gauge tubular steel and rides on two large standard turf tires. The direct drive from the P.T.O. rotates the four pneumatic drive wheels, which in turn move the tarp and its roller over the field.

### MINIMUM REQUIREMENTS:

Tractor with 14HP, 540 PTO and 3 Point Hitch

# TRACK SIDELINE COVERS

## TRACK SHIELD™ PROTECTOR

The Track Shield™ protector is ideal for athletic fields with surrounding running tracks. The wear and tear caused by athletes crossing onto the field can lead to costly repairs, but our proven track protector prevents damage before it happens. Track Shield™ is constructed from the toughest polypropylene geotextile material, allowing it to withstand and cushion against steel-tipped cleats, shoes, and even grounds equipment, yet still letting rain and other liquids drain through its surface. Track Shield™ stays in place, without requiring stakes or staples, thanks to a vinyl-wrapped galvanized steel chain inserted along its entire perimeter edge. Designed for game-day use, this combination of strength and lightweight material allows the Track Shield™ to withstand strong winds, while still being lightweight and easy to carry.

### FEATURES:

- Lightweight and easy to handle
- Tough material holds up against steel-tipped cleats and shoes
- Allows drainage of rain and other liquids
- Windproof without stakes or staples
- Graphics available

Standard Sizes:\*\*

15ft x 30ft • 15ft x 50ft • 7.5ft x 40ft

15ft x 40ft • 7.5ft x 30ft • 7.5ft x 50ft

SIDELINE COVER  
GRAPHICS AVAILABLE!

## A SOLUTION FOR TIGHT-FITTING SIDELINE TRACKS

If you're looking for an easy way to cover sideline bench areas and also protect an expensive track surface, we have a solution. Track Shield™ uses double-stitched vinyl edging with a steel chain insert around its perimeter to help keep the cover in place without using stakes or staples. Made from the toughest polypropylene geo-textile fabric, the ballasting ensures the cover is virtually windproof, yet still easy to handle and install. Velcro® hook and loop strips easily connect the longer protectors, which come in two sections and are double-stitched along the length of each section's overlapping chain-free center edges. Different color edging ensures maximum visibility for anyone crossing the track.

### FEATURES:

- Protects track surface in bench area
- Withstands and cushions against cleats, but allows rain to drain through
- Graphics available

Standard Sizes:\*\*

15ft x 75ft • 15ft x 125ft

15ft x 100ft • 15ft x 150ft

\*\*Custom sizes available upon request

# TRACK SIDELINE COVERS

## BENCH SHIELD™ SIDELINE TURF PROTECTOR

Some turf protection mats can triple in weight when wet and emit odors during storage. Bench Shield™ solves those problems by allowing rain, sweat, sports drinks, and other liquids to drain through, while standing up to cleats and other hazards. Made from non-absorbent, durable Pro Mesh™ fabric, it's as simple as hosing down to clean and store. Bench Shield™ uses an exclusive material that allows air and sunlight to penetrate, allowing the bench tarp to be left down for longer periods without causing turf damage. All edges have grommets installed every 18 inches, and are folded, internally reinforced, and double-stitched.

Colors:

NFL Style Upgrade 1: 108ft 8in X 24ft 4in X 90ft 8in

NFL Style Upgrade 2: 108ft X 31ft X 101ft

SIDELINE COVER  
GRAPHICS AVAILABLE!

## SIDELINE COVER GRAPHICS

Our crisp, multi-color graphics are designed to outperform other printing processes, lasting outdoors as long as the fabric. Using state-of-the-art graphics technology, our highly-skilled technicians create customized imprints that not only resist scuffing, sunlight, and weathering, but also stand up to spikes and cleats. Each image bonds to the vinyl material and completely covers the underlying fabric color by using a thick coating process that produces vivid, true colors.

## ENKAMAT PLUS™

A composite of geotextile bonded to Enkamat™. It has the qualities most groundskeepers look for in an all-round natural turf cover. It's effective. It's cost efficient. And it's easy to install and remove.

How it works makes it effective...

As a natural turf cover, Enkamat Plus™ works wonders. The geomatrix design of Enkamat™ keeps the geotextile off the turf to provide an air space underneath the cover so that the turf can breathe at all times. The geotextile also allows some light to penetrate while rain passes through to the grass.

Where it is used makes it impressive...

Enkamat Plus™ has many applications. Use it as a full field concert cover, a bench tarp, on paths or walkways around the field or with tent set-ups at tournaments in hospitality and player reception areas. Wherever a cover is needed to protect natural turf and maintain good looks, Enkamat Plus™ is the affordable cover you can count on.

Color: Grey\*

Standard Sizes:\*\*\*

8ft x 150ft • 16ft x 150ft

\* Actual colors may vary | \*\*Custom sizes available upon request | \*\*\*Can be cut onsite to any shape or size.

# WINDSCREENS | PADDING

## WINDSCREEN

A quality windscreen should provide wind and noise reduction, along with the added benefits of increased privacy, better player focus, and enhanced facility appearance. By using high tensile strength fabrics such as vinyl-coated mesh and polypropylene, we can offer the toughest, highest quality windscreen available

### PRO MESH™ WINDSCREEN\*\*

Our exclusive Pro Mesh™ material is an ultra-durable mesh fabric, comprised of tightly-woven microfibers that make it virtually tear-proof. Built for performance and durability, Pro Mesh Windscreen is finished with industry leading edge design.

Colors:

## PADDING

When it comes to protective padding for use around the stadium or sports field, you can rely on COVERMASTER® to meet your needs. Custom wall padding by COVERMASTER® provides superior protection. This custom made padding can be supplied with sponsor messages or team logos and is available in various thicknesses, foam densities and colors. Player protection is of prime importance in the design and manufacture of all COVERMASTER® custom padding.

### FEATURES:

- Foams: Open Cell Polyurethane or Closed Cell Cross-linked Polyethylene
- Choice of weather-proof plywood backing thickness: 1/2", 5/8", or 3/4"
- Attachments to fit on to walls, chain link fences, or concrete
- Z Channel attachments for wood or concrete walls
- Sizes: Standard and Custom, thicknesses from 1" to 4"
- Standard Padding is covered with 18 oz. vinyl
- High UV resistant Vinyl available for extreme sun areas

# SEAT COVERS & SPORTS SIGNAGE

## SPONSORSHIP AND CROWD CONTROL

COVERMASTER® Seat Covers solve the problem of excess seating capacity and can potentially generate extra advertising revenue. Whenever a stadium or sports field finds it desirable to camouflage unsold capacity, custom designed seat covers are the answer.

Since every event has each one different seating requirements, COVERMASTER® Seat Covers allow you to adapt your seating capacity to match. As they are custom made, they are a great way to display team logos and pennants, or generate revenue as an advertising medium.

COVERMASTER SEAT COVERS CONVERTED THIS 72,000 SEAT NFL STADIUM INTO AN INTIMATE 28,000 SEAT MLS STADIUM, COMPLETE WITH NEW BRANDING

**CROWD CONTROL** Seat Covers will help prevent spectators from using unassigned seats.

**MAINTENANCE** With fewer seats exposed to both natural elements and spectators, facilities can save on housekeeping costs before and after events.

**SPONSORSHIP** Generate extra advertising revenue.

**SECURITY** Controlled access of seating areas allows you to tailor your security requirements on an event basis.

**FULL HOUSE** During certain events, you may want to cover distant, obstructed, or unused seats to give the impression of a full house.

**WINTER PROTECTION** Provide protection from severe winter weather and UV degradation for premium seating areas.

**CUSTOM MADE** COVERMASTER® Seat Covers are custom made and designed to suit your specific requirements.

CONTROLLED ACCESS OF SEATING AREAS AT PORTLAND TIMBER'S HOME FIELD

SEATING AREAS PROTECTED FROM UV DEGRADATION

# TURF PROTECTION

## PLASTIC FLOORING FOR PEDESTRIAN USE

In today's economy, stadiums and athletic facilities need to use their venues for non-athletic events to increase revenues. However, protecting your major investment is of the utmost importance when it comes to covering an entire athletic field during concerts or dirt events or even just a small area. From the largest stadiums to the smallest gatherings, from the biggest rock bands to the smallest marching bands, COVERMASTER® has the answer for the perfect turf protection system that will meet both your needs and your budget.

### MASTERSHIELD PLUS™

Designed for Use on natural turf, synthetic turf and dirt/sand bases, MasterShield Plus™ is a snap lock portable event flooring system designed for high volume pedestrian traffic. Translucent sheets overlap to provide an easy to install, cost-effective turf protection system. Installing MasterShield Plus™ is simple - overlap each panel and step down until you hear MasterShield Plus™ snap into position, then move on to the next panel. No locks or swinging hinges required.

MasterShield Plus™ stadium flooring is ideally suited for covering both natural and synthetic turf. On natural turf installations, MasterShield Plus™ works equally well on both warm and cool season varieties. Manufactured from natural virgin translucent High Density Polyethylene (HDPE), MasterShield Plus™ allows sunlight to pass through the surface, thereby allowing photosynthesis to continue. Another advantage of utilizing translucent HDPE is that it allows the sunlight to penetrate the interlocking floor tiles and draw up ground moisture, which forms a canopy of moisture on the underside of the top surface. After sunset, when the temperature drops and the moisture condenses, it will drop back to the ground. This natural water recycling will provide water to keep the grass healthy. Top ventilation holes in the panels allow air and moisture to reach the turf.

We have designed the support walls of MasterShield Plus™ to be rounded on the bottom to eliminate sharp edges and reduce any potential damage or cutting of the natural turf. This feature will result in a better weight distribution on the tile, thereby reducing the possibility of a "cookie cutter" effect on the grass surface. For synthetic turf, MasterShield Plus™ was designed specifically for today's systems and offers a superior level of protection against foreign contaminants. The overlapping design, with integrated out of sight Snap-Locks, reduces any potential channels for spilled liquids to find their way to the artificial turf. The rounded lower support walls of MasterShield Plus™ will protect the synthetic turf, while only leaving a slight trace of its presence once removed, which can be easily and quickly brushed out. This design will also prevent shifting of the snap tiles on the artificial turf or the displacement of the infill.

### MASTERSHIELD LITE™

MasterShield Lite™ portable event flooring is a versatile stadium flooring system. It is ideal for natural and synthetic turf protection. It creates a homogeneous floor for areas where pedestrians and lightweight static equipment are to be used. MasterShield Lite™ portable flooring system is an economical way to turn your facility into a truly multi-purpose event venue, whether it is natural turf, synthetic turf or a dirt/sand base.

MasterShield Lite™ with air holes is ideal for natural turf fields. Each interlocking tile is designed with air holes, which allow for air ventilation and drainage. It has the added benefit of creating a moisture canopy underneath the tile, thereby creating an ideal amount of moisture for the natural grass. MasterShield Lite™ modular flooring may be used as turf protection for various varieties of cool and warm weather natural turf. MasterShield Lite™ without air holes is designed for synthetic turf and dirt/sand surfaces, as it greatly diminishes the likelihood of spills penetrating to the surface below. MasterShield Lite™ may be used for the protection of both duo and mono-filament synthetic turf and both rubber and sand in-fill types of sports fields. Both temporary flooring systems feature a cross ribbing structure core for effective weight distribution.

PORTABLE HARDWOOD COURT ON  
MASTERSHIELD LITE™

## MASTERSHIELD TRAX™

Designed for extra heavy duty stadium turf protection and temporary roadway use, MasterShield Trax™, with extremely high built-in spread load capabilities, is used as a heavy duty temporary roadway and is designed to take the weight and stresses exerted by forklifts, large trucks and 100 ton cranes as used in the outdoor concert business. With the culmination of over 40 years of experience in temporary roadway and event flooring solutions, Covermaster has used the latest computer aided design and testing to create a product that meets the challenges and requirements of the event flooring industry. MasterShield Trax™ is light enough to be put in position by hand, and with its overlapping design and unique interlocking system, it creates a continuous surface free from gaps. Each panel can be overlapped and interlocked with other panels, creating a smooth surface. The streamlined, integrated interlock system consists of five retained fasteners per panel that are engaged and disengaged by rotating them ninety degrees with the installation tool provided.

The lightweight design and fastening technology minimizes worker bending, eliminates the need for loose components, and contributes to a safe and efficient job site environment. The durable design can sustain the varying types of vehicular, stage, sound system, and other structural loading and wheeled traffic stress, and is compact and well suited for chair setups, tent flooring and pedestrian pathways. MasterShield Trax™ incorporates a flat bottom panel, which adds to its stability and strength.

## ECONOMICAL ROLL OUT COVERS FOR CONCERTS / CROWD GATHERINGS

**ENKAMAT PLUS™** - A composite of geotextile bonded to Enkamat™. It has the qualities most groundskeepers look for in an all-round natural turf cover. The geomatrix design of Enkamat™ keeps the geotextile off the turf to provide an air space underneath the cover, so that the turf can breathe at all times. The geotextile also allows some light to penetrate and permits rain to pass through. Wherever a cover is needed to protect natural turf and maintain good looks, Enkamat Plus™ is the affordable cover you can count on.

**ENKAMAT FLATBACK™** - A unique product designed for sports field surface protection which will allow the natural turf underneath to stay beautiful and green. It's easy to install, taking only a few hours to have the entire field covered. Enkamat Flatback™ has a tightly interwoven flat upper layer (hence its name 'Flatback') which can withstand the weight of thousands of people and staging equipment. Enkamat Flatback™ allows for air and rain to pass freely through to the turf below.

**MASTERSHIELD VINYL™** - A heavy duty vinyl cover, Mastershield Vinyl™ is a special use cover to protect synthetic turf sports surfaces. The cover is made of reinforced vinyl of extraordinary strength. It is fire retardant, waterproof, and rot and mildew resistant. Since the cover is easy to clean, the maintenance requirements are within the capabilities of virtually all types of facilities.

SYNTHETIC TURF PROTECTED WITH  
MASTERSHIELD VINYL™

# THE COVERMASTER® STORY

When it comes to any kind of sports surface, Covermaster® is proud to be the first choice for protection. Gymnasiums, ice arenas, outdoor sports fields, stadiums, tennis courts and even golf courses... for more than 50 years, Covermaster® has been leading the industry with cover solutions that both protect and increase the versatility of athletic venues worldwide.

Products from Covermaster® can convert sports centers into revenue-generating, multi-purpose facilities. Our unparalleled range of gym floor covers are safe, slip-resistant and durable. While other companies offer surface protection as a sideline business, we make it our specialty.

We supply innovative products made from the highest quality materials and provide unmatched customer service. That's what makes our lineup the preferred choice among discriminating Facilities Professionals around the world. In fact, 90% of National Football League teams, 90% of Major League Baseball teams and 85% of Major League Soccer teams are using one or more of Covermaster's surface covers on their fields.

With our online ordering system, Facilities Managers have an easy, 24/7 way to shop for standard items, request a quote on specialized options or receive a free sample.

Explore our ever-expanding selection of supporting products including spot covers, windscreens, seat covers and temporary roadways, or our printing capabilities that are ideal for everything from custom team graphics to sponsor advertising.

Whether it's a new gymnasium floor, turf, ice, or dirt, Covermaster® solutions are your best choice for premium, cost-effective protection and long service life.
