**Quality Modular Surfacing**

# Sport-Loc III

**Sport-Loc III** incorporates a unique leaf-spring type flex joint system.

This has three important advantages:

- ◆ Provides controlled lateral give during play for reduced leg stress and greater comfort to the player.
- ◆ Conforms to minor undulations in the substrate.
- ◆ Controls thermal expansion.

The **Sport-Loc III** outdoor tile features a high-density rib pattern for tremendous durability under the most demanding conditions. With its rugged construction and robust composition, this tile is able to withstand a sustained load of 16,000 pounds per square foot. What's more **Sport-Loc III's** innovative flow-through design allows rainwater and other liquids to drain quickly and completely making it safe for a variety of sports applications.

**Sport-Loc III** is manufactured with specially designed flex joints and can be installed under tension, providing the flattest most playable surface available. **Sport-Loc III** is uniquely desirable for basketball, volleyball, racquetball, dance floors, aerobics or any high activity floor requirements. **Sport-Loc III** is also recommended for locker rooms, saunas, steam rooms, pool areas, recreational areas and patios.

Best of all, **Sport-Loc III** is colorful, attractive and versatile. With 15 standard colors to choose from, any look is possible. And you can personalize it with custom logos and designs painted directly onto your **Sport-Loc III** tiles.
