## THE WORLD'S ONLY ENERGY PRODUCING TREADMILL

The sleek design combined with non-motorized technology, extremely low friction and a smart braking system provides an approachable, safe and versatile unit that caters to a broad spectrum of users.

Electronic speed/resistance control on a flat slat-belt design, allows for walking, jogging, running, sprinting or sled-pushing modes that make the unit feel remarkably natural and comfortable for a wide spectrum of training modalities, from HIIT to beginner's conditioning.

Verde is a non-motorized treadmill that looks and functions very similar to a traditional treadmill, while being virtually maintenance free and feeding up to 74% of user generated power back into the grid as utility grade electricity.
